One of our local doctors who loves a good joke furnishes us the following item which was read before a late meeting of a medical society, being the best and only contribution of the joking member who was absent on a fishing expedition:

"One of our prominent physicians was called to attend a patient yesterday, and while at the house one of the ladies of the family opened a discussion of the relative merits of the two schools of practice—homeopathy and allopathy. The doctor naturally supported his own views and methods, and finally, after the discussion had been carried on for some time the good old lady discovered that the physician was likely to get the best of the argument so concluded to yield a point which she did with the assertion that for infantry homeopathy might be the best but for adultery she preferred the good old-fashioned allopathy doctor."
